The new LookyHD Touch incorporates a 5-inch, bright, and intuitive touch screen, producing superb crystal clear images with exceptional clarity.

The LookyHD Touch is the most advanced yet simple to use portable magnifier on the market and incorporates many exciting features in one compact and sleek design.

Use it for reading, looking at pictures and for distance work. Tap the screen to focus. All the controls are on the screen and appear when required.

The handle, which has a dual purpose, also contains the battery. The handle can be easily removed for your convenience when the LookyHD Touch is not in use, and also replaced once the battery eventually depletes.
