The NEW "IMAGE"
hand-held magnifier with
Anti-Blur™ Technology.

Handle folded under

The NEW "IMAGE" hand-held magnifier with Anti-Blur™ Technology.

The large 4.3-inch screen displays the crispest picture available without blurring when reading.

Hold and use it like a magnifying glass and see whole words at a time not parts of words. See pictures in full colour or text in various high-contrast false colours. Read the newspaper again in comfort or instructions on packets or even the dial, on your washing machine The IMAGE hand-held magnifier is very versatile. Large multi-coloured buttons adjust the size, colour of text and freeze-frame. The IMAGE switches off automatically if left on by mistake to save the battery. The lights can be switched off as well depending on what is being read.

The handle can be folded under to fit in a pocket or in its case. It can also be used for large magnification reading. Simply fold the handle under the unit and place the IMAGE on the paper to be read. The screen is tilted towards you giving the right angle for optimum viewing.

Plug the IMAGE into a television and use it like a mouse camera. The magnified picture will be displayed on the television screen. The size is proportional to the screen being used.

Batteries.

The batteries are rechargeable, high power AA type and are housed in the handle. Simply plug the charger (supplied) into the charger socket on the side of the IMAGE to recharge. An overnight charge will give between 2½ to 3 hours use. They can be changed quickly and easily. if a fresh set need to be used.
