www.pamtrad.co.uk

A very flexible and portable video magnifier for your computer.

Only £1250 plus £7 p&p

iZoom £300 plus £7 p&p

OVERVIEW

Aumax-S is a dual, USB & VGA flexible output, multifunctional system. It is a powerful and portable magnification solution to any Windows platform computer. It is the perfect companion for school, at the office and at home.

**Distance viewing perfect
for classroom work**

**As a mirror for those
necessary occasions.**

**4-6 hour battery life with
interchangeable battery**

The Aumax-S is the magnification solution for seeing quality images near and far.

The fold-up, compact design only weighs 1.5 kg/3.3 lbs. Take it anywhere with you. The quick setup is ideal for classrooms, work environments and presentations.

The ultra-flexible camera head rotates 270 degrees vertically and 180 degrees horizontally, making distant text and images easy to see.

Magnification up to 72X is adjusted physically with a knob control. No need to remember computer key strokes.

Read smoothly and accurately with line markers and masking, the auto focus camera removes any focus problems. Fix the focus with the focus lock if required.

Compatible with most popular magnification software and all windows operating systems.

Battery power supply: Integrated and replaceable battery with 4-6 hours life provides ample support for outdoor working, conferences or seminars.

It can plug directly into a computer monitor to be used as a separate CCTV.

Folded up

A typical classroom situation

Dual output

The Aumax is fitted with two outputs (USB & VGA). It can be used with a computer or can be used independently with a monitor.

Push-button controls

To make life easier for the user the Aumax-S is fitted with physical controls for all the major functions e.g. Magnification, contrast, flipping the image, quick find and light on/off. No need to remember confusing multiple key operations.

2 year warranty.

Smooth framework design and tactile buttons Brightness adjustment.

Aumax-S split-screening with iZoom for desk or distance copy typing situations.

Where magnification is required when copy typing from text on a desk to the computer or at a distance to the computer is required then the answer is the Aumax-S working with iZoom.

iZoom is very clever it can work with different open windows on a desktop and split screen with them.

When iZoom is working with the Aumax-S the user preferences e.g. magnification, colours and contrast can be adjusted seperately.

Desk copy typing

Easy as pointing the camera down to the desk. The automatic focus adjusts automatically.

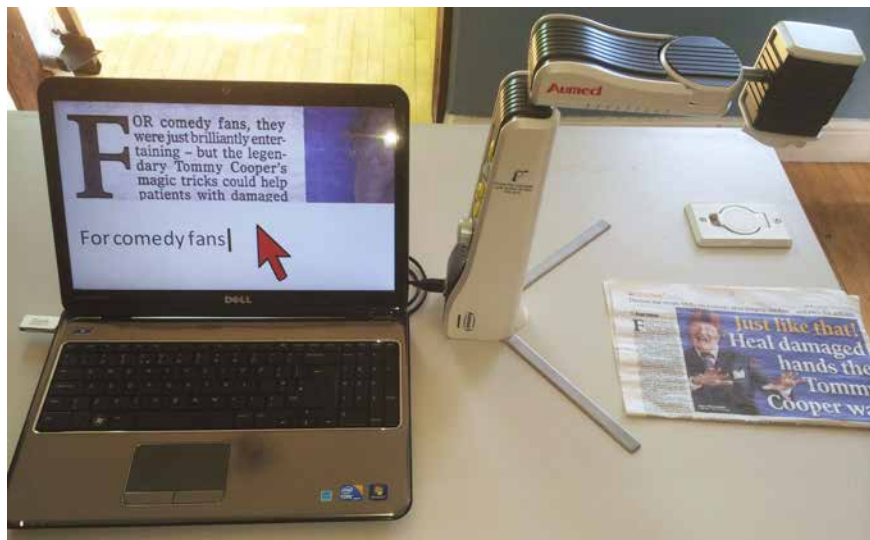

Distance copy typing

Point the camera at a white board, poster or notice board and flick the camera lens open, the camera will focus automatically.
